

Optimize your energy usage.

Increase the efficiency of your compressed air, gas, and vacuum systems.

With ElectroZad's *Leak Detection Service*, compressed air and gas leaks are identified so you can take action to repair and mitigate leaks that are leading to wasted energy usage. Your critical vacuum and exhaust systems will also benefit from being evaluated and tested.

Stop wasting energy.

Receive a detailed electronic report of all leaks identified in your facility that have been costing you thousands on wasted energy each year.

Tailored to meet your facility's needs.

Offered in full and half-day, as a service level agreement with scheduled visits, or booked on an as needed basis.

Recommendations to resolve potential issues.

We take the time to explain our findings and give recommendations to help you prioritize your remediation efforts.

BOOK NOW

Our service works for both indoor and outdoor facilities and gives you the peace of mind that you are doing everything you can to save money, time, and our planet.

WHAT TO EXPECT:

1. On-Site Assessment

We'll walk through your site identifying leaks, recording location and important metrics of the area of concern.

2. Report Delivery

We provide a detailed report outlining the location, severity, and potential cost of your leaks.

3. Report Readout Meeting

We meet with you online to review findings and recommendations.

Make us part of your energy savings budget this year. Together we can improve your efficiency, energy usage and sustainability.
